

# FEATURE THE FUTURE

## SUPPORTED BY

Agora Learning Centre, KU  
Leuven Libraries, Agora  
DigiLab

### WHAT DID YOU DO?

---

Our main goal was to attract students of all faculties, but mostly the Faculty of Arts, to DigiLab and put it in the spotlight, while showcasing ways technology such as 3D printing can be used in the humanities.

### ORGANIZED BY

---

Kat Craps  
Laura Kuške  
Deniz Cagtay Yilmaz

### WHAT DID YOU ACHIEVE?

---

We organised an exhibition to show real life examples of ways in which tech is used in the humanities, like interactive apps that show heritage objects. On our try-out table, visitors could experiment with some simple and fun apps and VR goggles. Feedback shows us we achieved our goal of teaching people something new.

### FUN FACT

---

We hosted a competition, the winner received a 3D printed model of the famous little statue Fonske, that was printed during the event.

### EXTERNAL LINKS

---

You can print Fonske too! Find the model here:
